PROJECTS

One Day, One Website
jQuery — CSS3 — SCSS

I build one website each day and each website is independent. Various skills and knowledge of HTML, CSS, Javascript, jQuery and CSS3 are utilized in these interesting and creative websites.

Personal Website
JavaScript — CSS3 — SVG

- Apply SVG to realize my own logo(sun and a rabbit face) on the homepage of my website.
- Apply *pagePiling.js* plugin to create a scrolling piles of sections in my CV.
- Blogs are used to track down the important skills and difficult problems I have ever encountered.

Mock Aldi Homepage
CSS — JavaScript

I find a bug on Aldi homepage carousel ads. Mock Aldi homepage with carousel ads and fix the bug.

Simulate Hashing Classifier
Python

Perform hashes on IP addresses, and using the resulting hash as an index for a lookup table to peed up the process of looking up, and matching data.
